

Above all else, an extrication glove must be tough. Built to last through countless difficult missions, the EXT Rescue® 4011 is the strongest, most dependable rescue safety glove available. We armed this glove with our improved IR-X® Impact Exoskeleton™ and a full TP-X® palm for added durability and grip. We also double-stitched all exterior and interior seams and added a 2.5" neoprene hook and loop closure on the cuff, so this glove fits as well as it lasts.

The EXT Rescue® 4011 is the HexArmor® commitment to the rugged vigilance of our first responders. HexArmor® knows that you will never give up, and neither should your glove.
