

CHROME
SERIES

4027

HexArmor®

Don't settle for anything less than the safest mechanic's glove on the market. The Chrome Series® 4027 was purpose-built for the building material and aggregate industries and features a SuperFabric® brand material palm that provides level F cut resistance giving over 5000 grams of protection, 20 times the amount offered by a standard leather glove. The 4027 takes glove durability to the next level with a double-stitched hi-vis TP-X® material palm that maintains excellent grip in dry and light oil situations and a Gunn cut construction that adds extra durability in common areas of wear. When it comes to tough gloves, this one tops them all.
